The last submittal is on ourpassaic under Tierra/reporting –link below-, you should have access to that view, but let us know if you don't. I have to do a backcheck of the comments and approve and post it on the public website.

We need the DEERS Report to review the Data Gaps Report; where can we find it - it is not on ournb....org?

OK, thanks.

So remind me - why does TMO attend the Modeling Collaboration meeting? We provided very detailed presentations on the CFT and Sediment Transport Model 6 weeks ago.

We can assemble something but I will have to share them with the TC and legal for review - so it may be Monday or Tuesday.

Rob,

Can you provide a couple of bullets on the status of each of the modeling efforts, please?: sediment transport, contaminant fate and transport, and bioaccumulation. Just a high-level bulleted summary that shouldn't take much time to prepare. I want to provide that to Tierra so they can address some of the NB PFD and CSM comments. Do you think you can send the text by the end of this week?

Thanks,

eugenia
